

To create a Weebly webpage:

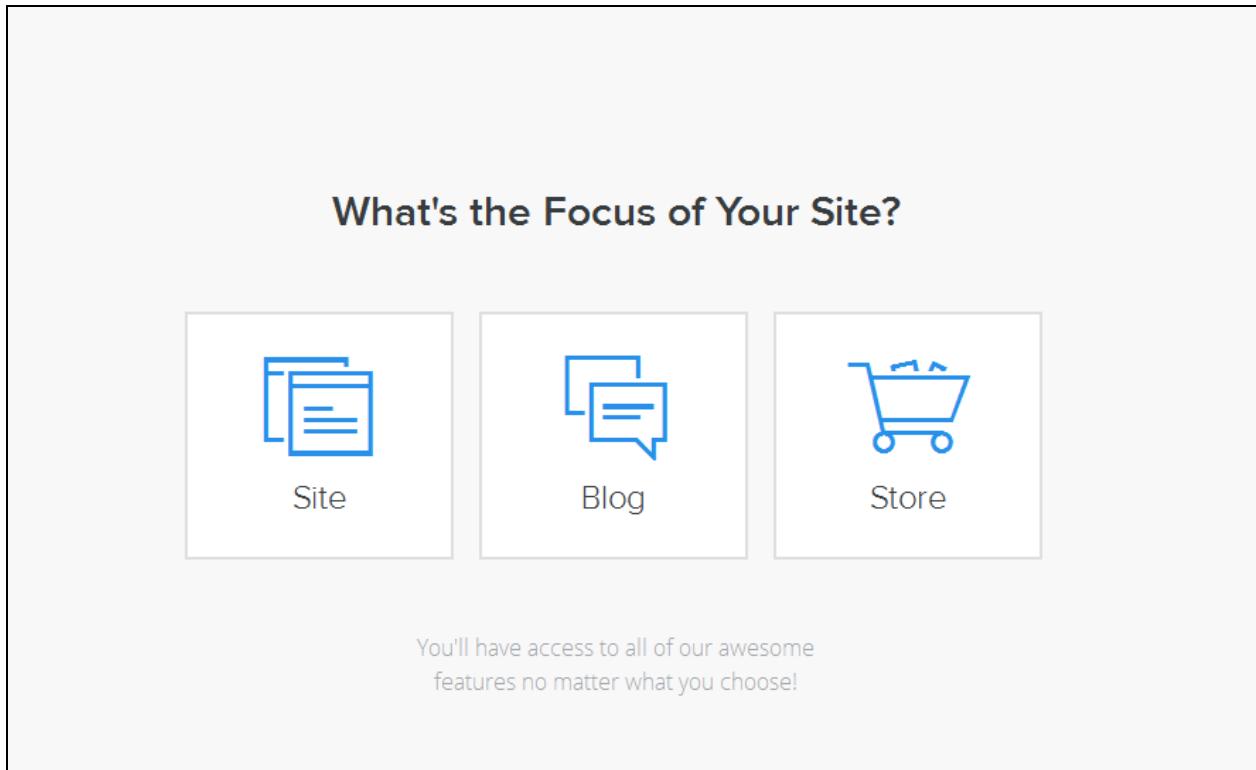

1. Go to Weebly.com and fill in your information under "Sign up for free" and click "Get Started." (You can use your last initial or make up a last name).

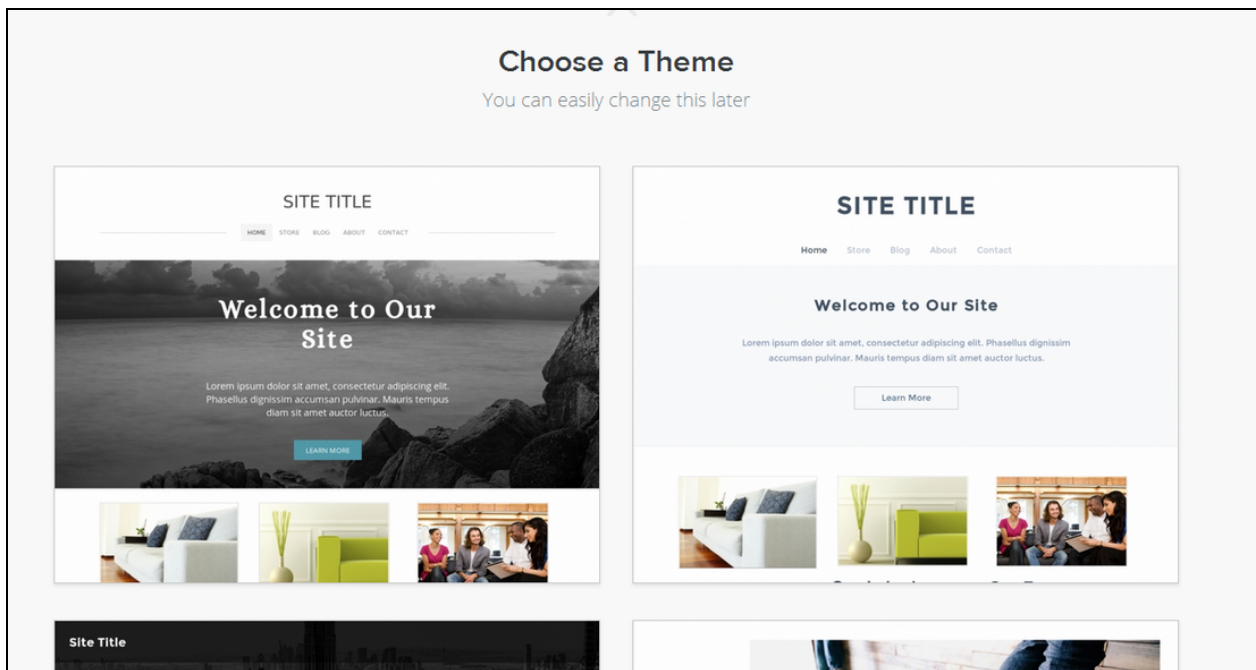

2. Choose the free version (on the far left)

3. Choose the focus of your site. You can add other pages later. **Choose "Site"** and use a standard page as the main page for your site, and create subpages or blog pages for different posts.

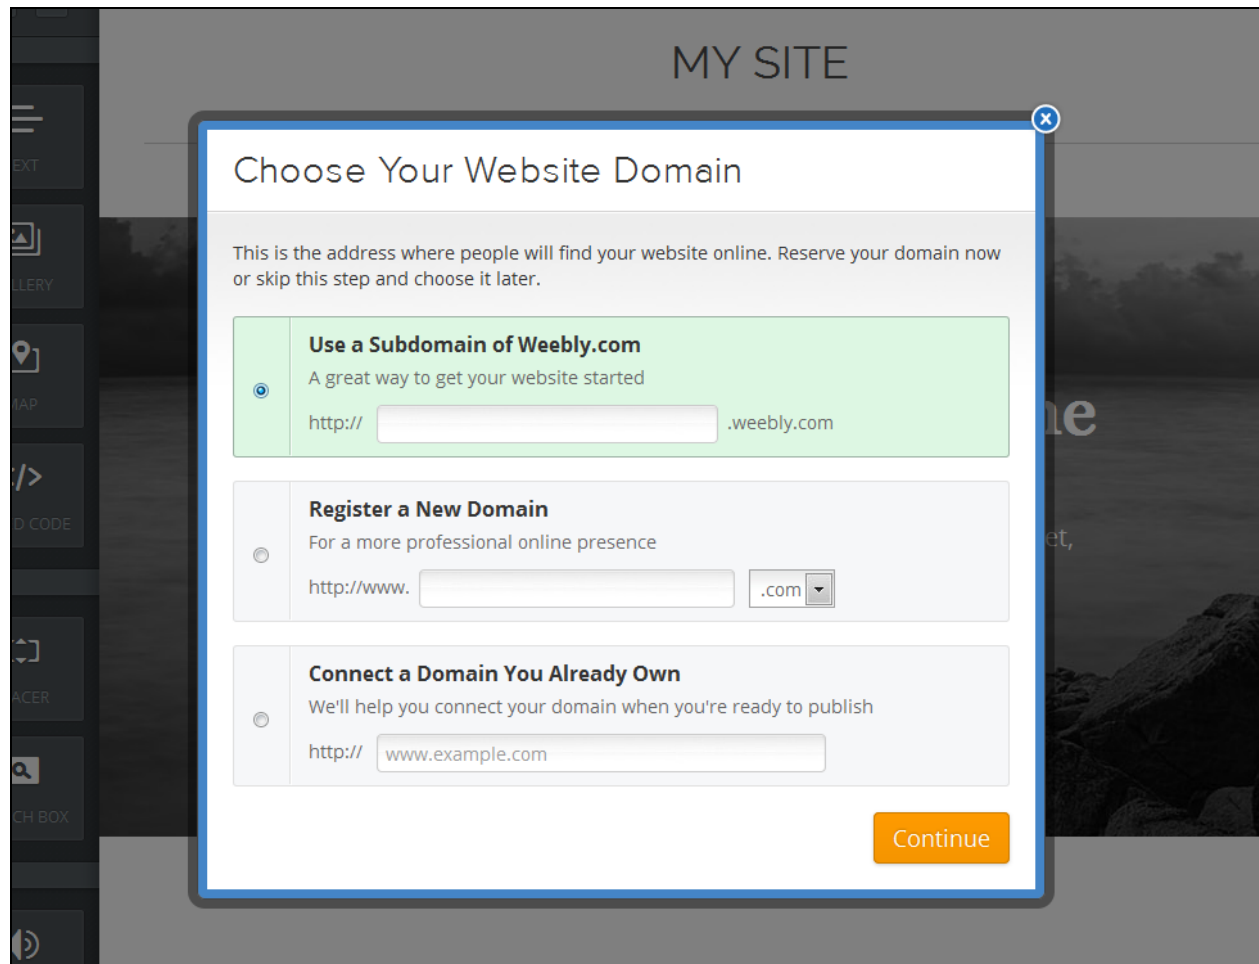

4. Choose a theme. You can change this later, so don't spend too much time here.

5. Choose your website domain. Select the first option that says "Use a Subdomain of Weebly.com" and choose a name for your website. For example, mine is **lecoursdefrancais.weebly.com**. You can do your first and last name, "jemappelle[name]" or something else that you will remember easily. Click "Continue" when you're done.

You can change this later.

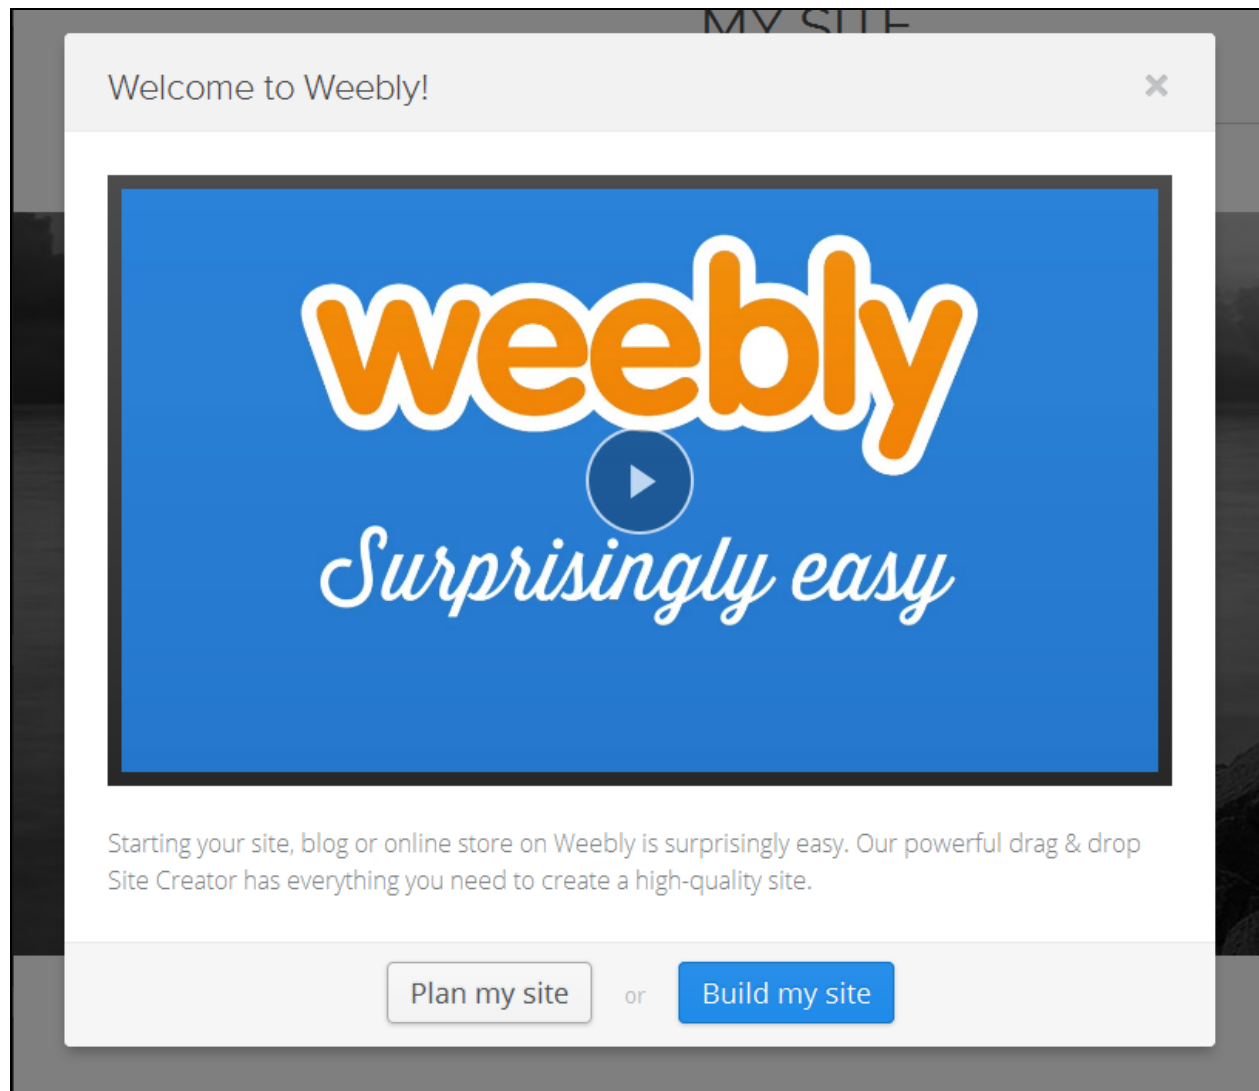

The screenshot shows a 'MY SITE' header at the top. Below it is a modal window titled 'Choose Your Website Domain'. The modal contains the following text: 'This is the address where people will find your website online. Reserve your domain now or skip this step and choose it later.'
